

NVQ

LEVEL 2

Curtain Wall Insulation

A curtain wall system is an outer covering of a building in which the outer walls are non-structural, utilized only to keep the weather out and the occupants in. Since the curtain wall is non-structural, it can be made of lightweight materials, thereby reducing construction costs.

Who is this suitable for?

This qualification is aimed at those who work as installers of curtain walling systems. The standards cover the most important aspects of the job.

This qualification is at Level 2, although some QCF qualifications may have units at different levels and should be taken by those who are fully trained to deal with routine assignments. Candidates should require minimum supervision in undertaking the job.

Course Contents

- » Induction to the programme
- » Safe working practices
- » Health and Safety
- » Safe manual handling

Assessment

The assessment methods include:

- » Practical assessment in a work setting
- » Opportunities to access group training
- » Individualised study

Awarding Body

This qualification allows the operative to gain their NVQ Level 2 certificate which will enable them to apply for and obtain their blue skilled workers card (SCS card) – either online or by post.

Duration

This course can be completed within 5 months and contains assessment carried out in the workplace.

Funding

Geason are able to access government funding for this course including the European Social Funding (ESF) and Adult Education Budget (AEB) funding. In addition, specific CITB grants are available and Geason have a dedicated team who will assist you to ensure you receive the maximum grants available.

Flexible Delivery and Dedicated Support

Once the learners are enrolled on the programme, they will be assigned a Skills Trainer. Our NVQ qualifications are delivered using various proven methods:

- » Coaching and mentoring
- » Workplace observations and practical tuition
- » Career planning
- » Assessment Delivery

Units

Mandatory

F11 – Maintain health and safety in the fenestration installation working environment

AG3 – Communicating and working with others in the glass and related working environments

F13 – Locate, transport, handle and position and materials and components in fenestration installation

CW1 – Identify and confirm installation requirements in glass and related work

CW2 – Install curtain walling systems

CW3 – Install infill units into curtain walling systems

Optional (One chosen)

CW4 – Post curtain walling activity

CW5 – Knowledge of curtain walling systems

F16 – Prepare site, equipment and tools for fenestration installation
